PROFESSIONAL SUMMARY

- 13+ years architecting enterprise QA ecosystems across SaaS, FinTech, telecom, and eCommerce; ISTQB certified; Generative AI and MCP certified.
- Championed end-to-end quality strategy, Agentic AI workflows, and CI/CD quality gates — reducing manual testing intervention by 60% in EDM SaaS.

CORE SKILLS

AI & Agentic Quality Engineering: Agentic AI Workflows, MCP Server, LLM Validation, GenAI Testing, Self-Healing Automation, GitHub Copilot, n8n, Claude, Gemini, Cursor

API & Integration Testing: REST Assured (Java), GraphQL, Postman, Pact Contract Testing, Karate, TestNG, SOAP UI, Insomnia, Microservices Validation

Test Automation Frameworks: Playwright (TypeScript), Selenium WebDriver, Cypress (JavaScript), Appium, Java Cucumber BDD, Robot Framework, Katalon Studio, UFT, Page Object Model

CI/CD & Cloud: Jenkins, Azure DevOps, GitHub Actions, Docker, Kubernetes, AWS, Azure, GCP, Terraform, Git

Performance, Observability & Data: JMeter, K6, Datadog, Grafana, Kafka, Snowflake, PostgreSQL, SQL Server, JIRA, Confluence

PROFESSIONAL EXPERIENCE

QA Automation Architect | S&P Global, Gurugram

02/2023 – Present

- Architected quality strategy for EDM (Enterprise Data Management) SaaS; owned automation coverage, quality KPIs, and release readiness criteria.
- Implemented closed-loop Agentic AI workflows via MCP Server; automated test generation, code fixes, and GitHub PR raises to accelerate delivery cycles.
- Drove Agentic AI QA adoption; self-healing automation and AI hotspot prediction reduced manual testing intervention by 60% in EDM SaaS.
- Built LLM auto-test-generation pipelines via Claude and GitHub Copilot; improved coverage velocity and reduced scripting overhead across squads.
- Integrated Playwright (TypeScript) into CI/CD via Azure DevOps (ADO); owned shift-left quality gates, test orchestration, and release readiness dashboards.
- Partnered with engineering and product to define SLOs and DORA metrics; built KPI dashboards and release readiness reports for senior management.
- Mentored cross-functional SDETs; defined test ownership, Root Cause Analysis (RCA) standards, and Agile/Scrum ceremonies to drive continuous improvement.

Lead SDET | Ericsson, Gurugram

03/2021 – 02/2023

- Led migration of 700+ scripts to Playwright (TypeScript) for Digital Experience Platform (DXP) telecom web applications; reduced defect leakage by 40%.
- Designed microservices automation using REST Assured (Java) and Karate; introduced Pact contract testing to reduce Kafka integration failures.
- Established API observability pipelines integrating Datadog and Grafana; ensured mandatory compliance and audit requirements throughout delivery.
- Mentored SDETs on Behaviour-Driven Development (BDD) standards; collaborated with engineering and product teams to clarify ownership and drive adoption.

Senior Engineer | GlobalLogic, Gurugram

02/2018 – 03/2021

- Designed Selenium WebDriver (Java) regression suites for Google Cloud Platform (GCP); improved delivery quality and test reliability for Google Inc.
- Built Docker-based test orchestration and reusable Page Object Model (POM) frameworks for cloud-native microservices on AWS and GCP.

Senior Automation Engineer | Publicis Sapient, Gurugram

07/2016 – 02/2018

- Built Selenium WebDriver (Java) and Java Cucumber BDD frameworks for eCommerce, FinTech, and Healthcare mobile; achieved 90%+ functional test coverage.
- Executed JMeter performance testing with BrowserStack cloud-parallel runs; drove shift-left QA practices for three global enterprise engagements.

Senior Engineer | Sopra Steria, Noida

07/2013 – 07/2016

- Built Selenium and UFT automation frameworks for easyJet web applications; mentored team members and standardised Java Cucumber BDD test patterns.
